PHENOMENA OF THE WISCONSINFIRE "CIVILIZATION AND PROGRESS."-There are some phrases of the great calamity which fell upon this region last week worthy of scientific investigation. The testimony of the cooler-headed survivors of the fires at Pesh-tigo, the Sugar Bush and Williamsonville, is united as to one phenomenon : They say that the fire did not come upon them gradually from burning trees or objects to the windward, but the first notice they had of it was a whirlwind of flame, in great clouds, from above the tops of the trees, which fell upon and enveloped everything. The atmosphere seemed one of fire. The poor people inhaled it, or the intensely hot air, and fell down dead. This is verified by the appearance of many of the corners. They were found dead in the roads and open spaces where there were no visible marks of fire near by, with not a trace of burning upon their body and clothing.

At the Sugar Bush, which is an extended clearing, in some places four miles in width, corpses were found in the open road, between fences which were only slightly burned. No mark of fire was near the content of the signal collum from fore tu aft—a hoss without a good phat spinal collum from fore tu aft—a hoss without a good phat spinal collum from fore tu aft—a hoss without a good phat spinal collum from fore tu aft—a hoss without a good phat spinal collum from fore tu aft—a hoss without a good phat spinal collum from fore tu aft—a hoss without a good phat spinal collum from fore tu aft—a hoss without a good phat spinal collum from fore tu aft—a hoss without a good phat spinal collum from fore tu aft—a hoss without a good phat typical was near sighted, and kan't see oats, and have tu wear green goggles make a hoss look tu much like a trakt pedler.
